

Model	pysentimiento/bert-it-hate-speech
Evaluation ID	99a5a030-257e-4582-8ed7-4bbb08ea6778
Status	FINALIZED
Created	2026-10-02T16:26:03.471303Z
Report	report_v1 · version 1 · generated 2026-10-02T17:54:34.653031Z

AUTO-FINALIZE (NO HUMAN REVIEW)

Human reviewed: no

Assessment engine: llm_v1

Disclosure: LLM-assisted O/S/D: FAIRNESS/ROBUSTNESS come from the heuristic mapping; INTEGRITY/EXPLAINABILITY/SAFETY were proposed by an LLM (provider and model recorded per aspect) or by the heuristic when every LLM provider failed. Not human-reviewed, not ground truth.

Methodology status: LEGACY_HEURISTIC OSD_V1. O = Occurrence, S = Severity, D = Detection (FRIES convention; higher is better/safer).

Executive Assessment

TrustLens FRIES report for pysentimiento/bert-it-hate-speech: FRIES withheld (AI-AUTONOMOUS, not human-reviewed)

- Evaluation mode: AI-AUTONOMOUS (workflow — not LLM interpretation)
- Original FRIES score: withheld — required human O/S/D is incomplete for at least one aspect
- Human reviewed: no
- Probe flags: constant_predictor, empty_card, evaluation_contract_v2, metrics_skipped, missing_license, thin_reproducibility, user_defined_local_dataset
- O/S/D are LLM-assisted proposals for INTEGRITY/EXPLAINABILITY/SAFETY (heuristic for FAIRNESS/ROBUSTNESS) — not ground truth.

FRIES

FRIES withheld. Required human O/S/D is incomplete for at least one aspect — see "Human O/S/D" below for exactly which. This is not a score of zero; no synthesized score exists yet.

Score type: original_FRIES · overall confidence 0.5004

Original FRIES computed from finalized O/S/D — not FRIES2. O/S/D on this path are LLM-assisted proposals (heuristic for FAIRNESS/ROBUSTNESS), not ground truth.

Inference backend	local_hf
CUDA available	True

Human O/S/D Assessment

O, S, and D are always human-entered — never inferred from probe evidence, never generated by a probe.

No finalized O/S/D aspects recorded.

Confidence summary

Method: geometric_mean_v1 · proposed calibration: True

Scope	Confidence
Overall	0.4467
FAIRNESS	0.54
ROBUSTNESS	0.3302
INTEGRITY	1.0
EXPLAINABILITY	0.3158
SAFETY	0.3158

Evidence Traceability

Per dimension: conclusion/risk-status → gate/rule → metric (see Dimension Evidence above, not repeated here) → evidence reference → human O/S/D → FRIES dimension score.

FAIRNESS

Status	INSUFFICIENT_EVIDENCE — model predicts class 0 for 98.4% of rows; group-fairness metrics are not meaningful for a constant predictor
Risk decision	Not scored
Gate / rule	No gate failures recorded
Human O/S/D	Not settled — O/S/D incomplete for this aspect
FRIES dimension score	Withheld

ROBUSTNESS

Status	INSUFFICIENT_EVIDENCE — model predicts class 0 for 98.4% of clean rows; perturbation stability of a constant predictor is not meaningful
Risk decision	not scored
Gate / rule	G-ROB-CONSTANT-PREDICTOR
Human O/S/D	Not settled — O/S/D incomplete for this aspect
FRIES dimension score	Withheld

INTEGRITY

Status	EVALUATED
Risk decision	risk detected — risks: I-INT-LICENSE-UNDISCLOSED
Gate / rule	No gate failures recorded
Human O/S/D	Not settled — O/S/D incomplete for this aspect
FRIES dimension score	Withheld
Limitations	Integrity risks measure disclosure and identity recording, not tampering or legal compliance.; Named Integrity risks are not additive FRIES occurrences and must not be summed into O.; Operator-supplied trusted hashes are not a PKI; hash match does not prove publisher authenticity; mismatch does not prove tampering.; Hub file listing fingerprint identifies sorted filenames, not model weight bytes.; SHA-like revision format is an uncalibrated heuristic, not cryptographic proof of immutability.; Model card text may reflect the Hub default branch, not the pinned revision.; Post-import file-listing re-verification detects a changed Hub listing, not weight-byte tampering — it never downloads or hashes weight files.

EXPLAINABILITY

Status	INSUFFICIENT_EVIDENCE — no model card text — cannot evaluate documentation
Risk decision	not scored
Gate / rule	G-EXP-CARD-EMPTY
Documentation coverage	0.00
Human O/S/D	Not settled — O/S/D incomplete for this aspect
FRIES dimension score	Withheld
Limitations	Explainability v1 measures model-card documentation completeness and simple consistency flags, not runtime explanations or attribution quality.; Named E-DOC-* values are evidence-layer detections only; scored_risk_id remains null and no FRIES occurrence is assigned.; aspect_scoring=risk_detected means a documentation risk was detected — not a FRIES-scored risk.; Alias heading matching and keyword contradiction checks are heuristic and uncalibrated.; coverage_ratio counts present required sections; it is not an explainability quality score.

SAFETY

Status	INSUFFICIENT_EVIDENCE — no model card text — cannot evaluate safety disclosures
Risk decision	not scored
Gate / rule	G-SAFE-CARD-EMPTY
Documentation coverage	0.00
Human O/S/D	Not settled — O/S/D incomplete for this aspect
FRIES dimension score	Withheld
Limitations	Safety v1 measures model-card safety-disclosure completeness and lexical phrase matches, not runtime refusal or harm behavior.; Named S-GOV-DISCLOSURE-GAP is an evidence-layer detection only; scored_risk_id remains null and no FRIES occurrence is assigned.; aspect_scoring=risk_detected means a governance disclosure gap was detected — not a FRIES-scored risk.; high_impact_claims are documentation metadata flags; they are never promoted to risks_triggered and do not map to O/S/D or FRIES.; Alias heading matching and phrase substring checks are heuristic and uncalibrated.; coverage_ratio counts present required disclosure sections; it is not a safety quality score.

O/S/D representation

Methodology status: **LEGACY_HEURISTIC_OSD_V1** — LLM-assisted O/S/D suggestion — INTEGRITY/EXPLAINABILITY/SAFETY proposed by an LLM (heuristic fallback when all providers fail), FAIRNESS/ROBUSTNESS by the heuristic; proposed, not ground truth; requires human validation.

Aspect	O (Occurrence)	S (Severity)	D (Detection)	Evidence strength	Rationale
FAIRNESS	Unavailable	Unavailable	Unavailable	0.54	[PROPOSED / REQUIRES VALIDATION] FAIRNESS: fairness status is INSUFFICIENT_EVIDENCE; agent abstained because evidence is unavailable. Heuristic metric-to-O/S/D mapping — not validated science.
ROBUSTNESS	Unavailable	Unavailable	Unavailable	0.3302	[PROPOSED / REQUIRES VALIDATION] ROBUSTNESS: adversarial attack was skipped; agent abstained because evidence is unavailable. Heuristic metric-to-O/S/D mapping — not validated science.
INTEGRITY	5	5	8	1.0	[PROPOSED / REQUIRES VALIDATION] INTEGRITY: metadata check pass rate=0.50. Heuristic metric-to-O/S/D mapping — not validated science.
EXPLAINABILITY	2	2	3	0.3158	[PROPOSED / REQUIRES VALIDATION] EXPLAINABILITY: model card is empty; low default band. Heuristic metric-to-O/S/D mapping — not validated science.
SAFETY	1	6	8	0.3158	[PROPOSED / REQUIRES VALIDATION] SAFETY: severe_fnr=0.972, fnr_ratio=0.99. Heuristic metric-to-O/S/D mapping — not validated science.

OSD overall evidence-strength mean: 0.5004 (not FRIES certainty)

TrustLens version	—
Contract kind	documentation_only

Re-running this exact contract (same model + dataset revision) uses the same local inference path. This is reproducible configuration, not a claim of bitwise-identical output.

Documentation Sources

Source	Type	URL	Revision	Hash	Retrieval
HF card (pinned)	model_card	https://huggingface.co/pysentimiento/bert-it-hate-speech/blob/9a60ac39953b872bca7f904729b0c421de42ecc9/README.md	9a60ac3995	—	not_found

Limitations

- Alias heading matching and keyword contradiction checks are heuristic and uncalibrated.
- Alias heading matching and phrase substring checks are heuristic and uncalibrated.
- Explainability v1 measures model-card documentation completeness and simple consistency flags, not runtime explanations or attribution quality.
- Hub file listing fingerprint identifies sorted filenames, not model weight bytes.
- Integrity risks measure disclosure and identity recording, not tampering or legal compliance.
- Model card text may reflect the Hub default branch, not the pinned revision.
- Named E-DOC-* values are evidence-layer detections only; scored_risk_id remains null and no FRIES occurrence is assigned.
- Named Integrity risks are not additive FRIES occurrences and must not be summed into O.
- Named S-GOV-DISCLOSURE-GAP is an evidence-layer detection only; scored_risk_id remains null and no FRIES occurrence is assigned.
- Operator-supplied trusted hashes are not a PKI; hash match does not prove publisher authenticity; mismatch does not prove tampering.
- Post-import file-listing re-verification detects a changed Hub listing, not weight-byte tampering — it never downloads or hashes weight files.
- SHA-like revision format is an uncalibrated heuristic, not cryptographic proof of immutability.
- Safety v1 measures model-card safety-disclosure completeness and lexical phrase matches, not runtime refusal or harm behavior.
- aspect_scoring=risk_detected means a documentation risk was detected — not a FRIES-scored risk.
- aspect_scoring=governance_detected means a governance disclosure gap was detected — not a FRIES-scored risk.
- coverage_ratio counts present required disclosure sections; it is not a safety quality score.
- coverage_ratio counts present required sections; it is not an explainability quality score.
- high_impact_claims are documentation metadata flags; they are never promoted to risks_triggered and do not map to O/S/D or FRIES.
